

TrayWrap

TrayWrap is Mondy's paper alternative to plastic tray wrapping. It uses Advantage StretchWrap which has an outstanding stretch and high-tensile strength, even in the low grammage of 70 gsm, making it a reliable lightweight wrapping solution for transporting products.

The properties of the paper ensure that the contents are secure during handling, storage, transportation and protect the pack in terms of quality and shape. TrayWrap can be used for folding boxes, liquid cartons, vacuum packs, cans, cups and other products.

Features

- + 100% responsibly sourced fresh fibres
- + Uncoated kraft paper
- + High puncture resistance
- + Exceptional tensile energy absorption

Sustainability

- + Widely recyclable
- + Certified compostable substrate
- + Made of renewable materials
- + Responsibly sourced (certificates upon request)
- + Paper profiles available

Applications

- + Tray wrapping for transportation
