

MailerBAG

Recyclable

**Made with
100% paper**

**Up to 70%
CO₂e reduction**

SUSTAINABLE PAPER PACKAGING for your eCOMMERCE

MailerBAG is a sustainability-focused, patented paper bag for eCommerce shipments that offers cost efficiency and customer experience. Available in a wide range of designs and sizes.

Benefits

- + Lower logistics costs
- + Easily adapts to the shape of the contents
- + Faster packaging process
- + Large Mondi production network for a short supply chain (shorter transport distances)

Attributes

- + Different designs and sizes available (from very small to XXL)
- + Different bottom options available (folded, flat, pinched)
- + Available with or without gusset
- + Various features to increase productivity in packaging lines
Elimination of empty filling material

Applications

- + eCommerce
- + Fashion items (e.g. shoes, clothing, accessories)
- + Home textiles
- + All other applications depending on primary packaging

Sustainability

- + Recyclable in standard paper mills¹ in Europe and widely recyclable in the US and Canada²
- + Plastic-free
- + Minimises the amount of material required by more than 80%³
- + Reduces the carbon footprint by 17% up to 70% CO₂e compared to other eCommerce packaging solutions⁴
- + Made with 100% responsibly sourced fibre
- + Made from renewable materials

¹ based on CEPI method and protocol evaluation. Test performed at Mondi Frantschach Lab

² on the basis of How2Recycle pre-qualification

³ comparison between a MailerBag (44gr) and a corrugated solution (244gr) with the same function and use

⁴ MailerBag (44gr) compared with 50my PE bag and a 244gr corrugated solution. Calculation made with Mondi's Product Impact Assessment tool (PIA)
