

Release Liner for Building & Roofing

Mondi's product range is a comprehensive solution for bitumen roofing, tackling challenges such as chemical migration and production process challenges.

Features

- Available in various colours
- Secure and stable supply chain
- Excellent barrier properties
- Wide widths coating options (up to 2m)
- Embossing, micro-perforating and tear-strips available
- Printing options on the reverse side or under silicone
- Customised release performance from easy to tight

Applications

- Self-adhesive for roofing (shingles, roll materials)
- Self-adhesive insulation materials

Sustainability

- Responsibly sourced & certified paper
- Recyclable
- Available with up to 70% recycled paper content

Technical Data

Products	Width	Basis weight	Silicone technology	
			solvent free	solvent
Paper-based solutions	min-max, mm	g/m ²		
Polycoated Kraft Paper (PCK)	20-2200	70-140	●	●
Supercalendered Kraft Paper (SCK)	20-2300	60-134	●	

	Width	Thickness	Silicone technology	
			solvent free	solvent
Film-based solutions	min-max, mm	µm		
BitProLiner® - barrier	20-2300	25-40	●	
BitProLiner® - perforated	20-2300	25-40	●	
Polyethylene Film (PE-HD)	20-2300	25-125	●	
Polypropylene Film (PP)	20-2300	25-50	●
