

Release Liner for Medical Applications

Through our integrated set-up and diverse technologies for paper and film-based solutions, we are uniquely positioned to offer it for a wide variety of medical applications.

- Features**
 - 
 - Customised release performance from easy to tight
 - Individual packing and slitting
 - Safe and easy product application
 - Unprinted or printed on reverse side
 - Print under PE or silicone
 - Available in various colours

- Applications**
 - 
 - Advanced wound care
 - Consumer application
 - Heat Sealable packaging solution
 - Process liner

- Sustainability**
 - 
 - Responsibly sourced & certified paper

Technical Data

Products	Coating				Basis weight	Silicone technology			
	silicone	1-side	2-side	heat seal > 7gr		g/m ²	solvent based	solvent free	UV silicone
Paper-based solutions									
Clay Coated Kraft Paper (CCK)	●	●			50, 60, 70, 80, 98, 120, 135		●		
Glassine (GL)	●	●	●		range of thickness		●		
Machine Glased Paper (MG)	●	●		●	35, 40, 45, 50, 60		●		●
Machine Finished Paper (MF)	●	●		●	35, 40, 45, 50, 60		●		●
Polycoated Kraft Paper (PCK)	●	●	●		range of thickness	●	●		●
Supercalendered Kraft Paper (SCK)	●	●			56,58,60,78,88,100,120		●		

Products	Coating				Thickness	Silicone technology			
	silicone	1-side	2-side	heat seal > 7gr		µm	solvent based	solvent free	UV silicone
Film-based solutions									
Polyester Film (PET)	●	●			range of thickness	●		●	
Polyethylene Film (PE-HD)	●	●			range of thickness			●
