

Mondi Group

GRI & SASB index 2025

GRI & SASB index

The Mondi Sustainable Development report 2025 has been prepared and independently assured in accordance with the GRI Standards using the Universal Standards (2021) and the Sustainability Accounting Standards Board (SASB) – Containers & Packaging Industry Standard (October 2018).

We have applied the GRI Guidelines to our annual Sustainable Development (SD) reports since 2009. We have published our reports in accordance with the GRI Universal Standards since 2022, and the SASB Standards Application Guidance since 2020.

Guided by the GRI Universal Standards for structure and principles of reporting, we define our SD report 2025 content through internal and external processes, including risk management (see pages 17-19), double materiality assessment (see pages 12-13) and regular engagement with our key stakeholder groups (see pages 15-16).

We also report our performance against the sustainability metrics defined in our non-financial reporting system for internal and external reporting of key performance indicators (covering safety and health, wood procurement, forestry, environment, energy and products).

The 2025 SD reporting suite supports the transition to the reporting requirements of the European Sustainability Reporting Standards (ESRS) and includes disclosures based on our current understanding of the ESRS requirements. This includes our material topics as well as the impacts, risks and opportunities.

 See our material sustainability topics in the SD report 2025 on pages 12-13

Disclosure on GRI and SASB requirements is available across MAP2030 action areas, the Responsible Business Practices, as well as throughout this index. The chapters generally include more than one GRI topic/material topic. For example, the 'Environmental Performance' section includes information relating to waste, water consumption, emissions to water and air, while the 'Created by Empowered People' and 'Human Rights' sections include the topics of employment, labour/management relations, human rights assessment and diversity and equal opportunity.

Statements provided in the SD report 2025 'Sustainability governance' section on the governance and accountability of sustainability at Mondi is valid for all reported MAP2030 action areas, and all GRI topics included in this report.

Our Sustainable Development Management System (SDMS) governs our approach, and we have systems in place to support the monitoring and measurement of our performance

 See the SD Committee's agenda in the Integrated report 2025 on page 98

Our MAP2030 framework enables us to monitor, improve and communicate on our sustainability performance. MAP2030 consists of a set of commitments that shape our approach, with medium- and long-term targets to track our progress by 2030, or earlier. Our long-term science-based Net-Zero target guides our progress against a 90% reduction of GHG emissions by 2050.

GRI & SASB index continued

Statement of use	Mondi has reported in accordance with the GRI Standards for the reporting period 2025 (1 January 2025 to 31 December 2025)
GRI 1 used	GRI 1: Foundation 2021
Applicable GRI Sector Standard(s)	None

GRI/SASB standards	Disclosure	Location in reporting suite	Direct answers, notes and omissions
GRI 2: General Disclosures (2021)			
The organisation and its reporting practices			
2-1	Organisational details	Integrated report – Shareholder information (page 207)	
2-2	Entities included in the organisation’s sustainability reporting	Integrated report – List of subsidiaries and associated undertakings and other significant holdings (pages 195–198)	The entities included in the Integrated report and financial statements 2025 are identical to the entities covered in the SD report 2025.
2-3	Reporting period, frequency and contact point	SD report – Reporting standards and scope (pages 103–105), Back cover (page 108)	
2-4	Restatements of information	SD report – Reporting standards and scope (page 103–105), Back cover (page 108)	
2-5	External assurance	SD report – Independent Assurance Report (pages 106–107)	
Activities and workers			
2-6	Activities, value chain and other business relationships	SD report – Our business (page 3), Our material sustainability topics across the value chain (pages 14), Reporting standards and scope (page 103–105)	Organisational changes: On 31 March 2025, the Group completed the acquisition of Schumacher Packaging’s Western European corrugated converting and solid board operations (Schumacher). During the year we have ceased production in our paper bags plants in Mondi Bags Hungária (Hungary) and Mondi Gebze (Türkiye). With effect from 1 October, the Group has been organised into two business units – Corrugated Packaging and Flexible Packaging. We have combined Uncoated Fine Paper with Corrugated Packaging to form an enlarged Corrugated Packaging Business Unit.
2-7	Employees	ESRS & Performance index (pages 8 and 11)	Information unavailable: data on non-guaranteed hours of employees.
2-8	Workers who are not employees		We had an average of 13,865 contractors across the Group for harvesting activities at our forestry operations and maintenance shuts at our pulp and paper mills as well as the projects at numerous sites that include contractors. This is calculated as the average across the reporting period in full-time equivalent. Variations in numbers throughout the year are caused by the timing of maintenance shuts, the harvesting season in forestry operations and CAPEX projects.
Governance			
2-9	Governance structure and composition	SD report – Sustainability governance (page 17) Integrated report – Board of directors (page 69), Executive Committee and Company Secretary (page 69)	
2-10	Nomination and selection of the highest governance body	Integrated report – Nominations Committee (page 83)	
2-11	Chair of the highest governance body	Integrated report – Board of directors (page 70)	
2-12	Role of the highest governance body in overseeing the management of impacts	SD report – Sustainability governance (pages 17–19), Our material sustainability topics (page 12)	

GRI & SASB index continued

GRI/SASB standards	Disclosure	Location in reporting suite	Direct answers, notes and omissions
2-13	Delegation of responsibility for managing impacts	SD report – Sustainability governance (page 17)	
2-14	Role of the highest governance body in sustainability reporting	SD report – Sustainability governance (pages 17-18)	
2-15	Conflicts of interest	Integrated report – Division of responsibilities (page 77)	There were no conflicts of interest raised in 2025. Should any arise, they would be disclosed to stakeholders.
2-16	Communication of critical concerns	SD report – Human rights (page 89), Business Conduct (page 100)	
2-17	Collective knowledge of the highest governance body	Integrated report – Board of directors, Executive Committee and Company Secretary (70-71), Composition, succession and evaluation (page 81-82)	
2-18	Evaluation of the performance of the highest governance body	Integrated report – Composition, succession and evaluation (pages 81-82)	
2-19	Remuneration policies	SD report – Sustainability governance (page 19) Integrated report – Remuneration report (pages 107-113)	
2-20	Process to determine remuneration	Integrated report – Remuneration report (pages 103-104, 107-113)	
2-21	Annual total compensation ratio	Integrated report – Remuneration report (page 120)	
Strategy, policies and practices			
2-22	Statement on sustainable development strategy	SD report – Leadership insights (pages 5), Mondi Action Plan 2030 (page 7)	
2-23	Policy commitments	SD report – Sustainability governance (page 18), Circular Driven Solutions (pages 31 and 34), Created by Empowered People (pages 42, 46, 47), Taking Action on Climate (pages 60, 69, 74), Environmental performance (pages 80, 83), Human rights (pages 87), Procurement (page 96), Business Conduct (page 99)	
2-24	Embedding policy commitments	SD report – Sustainability governance (pages 17-19), Circular Driven Solutions (pages 29 and 33), Created by Empowered People (pages 42, 46, 47), Taking Action on Climate (pages 60, 69, 74), Environmental performance (pages 80, 83), Human rights (pages 87), Procurement (page 96), Business Conduct (page 99)	
2-25	Processes to remediate negative impacts	SD report – Sustainability governance (pages 18-19), Circular Driven Solutions (pages 23, 29), Created by Empowered People (pages 40, 43, 47), Taking Action on Climate (pages 57, 65, 70), Environmental performance (pages 80 and 84), Human rights (pages 87-88), Communities (page 90-92), Procurement (pages 96-98), Business Conduct (page 99).	
2-26	Mechanisms for seeking advice and raising concerns	SD report – Human Rights (page 88), Business Conduct (page 100)	The policy owners are responsible for providing advice on the implementation of the Group's policies and practices.
2-27	Compliance with laws and regulations	SD report – Circular Driven Solutions (page 27), Created by Empowered People (page 47), Taking Action on Climate (page 68), Environmental performance (page 74), Business Conduct (page 99) ESRS & Performance index (page 14)	Beyond environmental incidents and fines disclosed (page 84), Mondi has not received any material fines or non-monetary sanctions for non-compliance with laws and regulations in relation to competition compliance, business integrity, data protection or sanctions. The Group is not aware of any pending prosecutions in this respect.
2-28	Membership associations	SD report – Circular Driven Solutions (pages 35-36), Taking Action on Climate (page 73)	

GRI & SASB index continued

GRI/SASB standards	Disclosure	Location in reporting suite	Direct answers, notes and omissions
Stakeholder engagement			
2-29	Approach to stakeholder engagement	SD report – How we engage with our stakeholders (pages 15-16)	
2-30	Collective bargaining agreements		We are currently reviewing our systems and will include this CBA coverage in future reporting.
GRI 3: Material topics (2021)			
3-1	Process to determine material topics	SD report – Our material sustainability topics (pages 12-13)	
3-2	List of material topics	SD report – Our material sustainability topics (page 13)	
SASB – Activity metrics			
RT-CP-000.A	Amount of production, by substrate	Integrated report – Our business model (page 6) SD report – Our material sustainability topics across the value chain (page 14), Environmental performance (page 82)	
RT-CP-000.B	Percentage of production as: (1) paper/wood, (2) glass, (3) metal, and (4) plastic	Integrated report – Our business model (page 6) SD report – Environmental performance (page 82)	As metric units differ for these materials, we provide absolute volumes in our energy and materials flow on page 84.
RT-CP-000.C	Number of employees	ESRS & Performance index (pages 8, 11)	Mondi employed 23,787 people as at 31 December 2025.
Circular Driven Solutions – Make our packaging and paper solutions reusable, recyclable or compostable			
GRI 3: Material topics (2021)			
3-3	Management of material topics	SD report – Circular Driven Solutions (pages 23-28)	We describe our management approach for each material topic under specific sections throughout our SD report.
GRI-301: Materials (2016)			
301-1	Materials used by weight or volume	SD report – Environmental performance (page 82)	
301-2	Recycled input materials used	SD report – Environmental performance (page 82)	
GRI-416: Customer health and safety (2016)			
416-1	Assessment of the health and safety impacts of product and service categories	SD report – Circular Driven Solutions (page 29)	As part of our commitment to product quality, we maintain relevant and credible certifications at our operations to meet the requirements of different sectors and applications. They include ISO 9001 (quality management), ISO 14001 (environmental management) and food safety. We cannot provide a percentage for the number of product or service categories, as this is monitored at a site level and applies to all relevant products produced at each site.
416-2	Incidents of non-compliance concerning the health and safety impacts of products and services		In 2025, we were not made aware of any incidents of non-compliance with regulations and voluntary codes on customer safety and health.

GRI & SASB index continued

GRI/SASB standards	Disclosure	Location in reporting suite	Direct answers, notes and omissions																									
SASB – Product safety																												
RT-CP-250a.1	Number of recalls issued, total units recalled		There were no product recalls reported in 2025.																									
RT-CP-250a.2	Discussion of process to identify and manage emerging materials and chemicals of concern	SD report – Circular Driven Solutions (pages 27, 84, 97)	As defined in our Environmental Impact and Resource Efficiency Operating Standard, operations have in place an environmental impact assessment to identify, evaluate and manage environmental and social risks. This includes the storage, handling and disposal of chemicals and hazardous materials in an ethical and responsible manner. Operations are required to have an inventory of toxic and dangerous chemicals used and stored, and must develop a plan to replace these materials with less harmful substances as far as their use is feasible.																									
SASB – Product life cycle management																												
RT-CP-410a.1	Percentage of raw materials from: (1) recycled content, (2) renewable resources, and (3) renewable and recycled content		Information unavailable. We are unable to provide the percentage of raw materials consumed derived from renewable sources and from renewable and recycled content due to different metric units used for different materials. Below we have provided a breakdown of our renewable material groups. <table border="1" data-bbox="1272 715 2161 933"> <thead> <tr> <th>Purchased</th> <th>Recycled content</th> <th>Renewable resources</th> <th>Renewable and recycled</th> <th>Total</th> </tr> </thead> <tbody> <tr> <td>Wood (million m³)</td> <td>–</td> <td>15.1</td> <td>–</td> <td>15.1</td> </tr> <tr> <td>External pulp (million tonnes)</td> <td>–</td> <td>0.2</td> <td>0.01</td> <td>0.2</td> </tr> <tr> <td>Paper for recycling (million tonnes)</td> <td>–</td> <td>–</td> <td>1.5</td> <td>1.5</td> </tr> <tr> <td>Resins and films (tonnes)</td> <td>5,872</td> <td>219</td> <td>–</td> <td>6,091</td> </tr> </tbody> </table>	Purchased	Recycled content	Renewable resources	Renewable and recycled	Total	Wood (million m ³)	–	15.1	–	15.1	External pulp (million tonnes)	–	0.2	0.01	0.2	Paper for recycling (million tonnes)	–	–	1.5	1.5	Resins and films (tonnes)	5,872	219	–	6,091

GRI/SASB standards	Disclosure	Location in reporting suite	Direct answers, notes and omissions
Created by Empowered People – Build skills that support long-term employability			
GRI 3: Material topics (2021)			
3-3	Management of material topics	SD report – Created by Empowered People (pages 40-42)	
GRI-404: Training and education (2016)			
404-1	Average hours of training per year per employee	SD report – Created by Empowered People (page 42)	Information unavailable: the breakdown of training hours by gender is not available in 2025.
404-2	Programmes for upgrading employee skills and transition assistance programmes	SD report – Created by Empowered People (page 42)	For those employees close to retirement, confidence and quality of work relations are improved by the knowledge that they are supported in the transition from work to retirement, for example through pre-retirement planning, flexible working models in transitioning to retirement, administration assistance, severance pay or consultancy agreements. This is a locally driven programme so we do not have a central overview of the transition assistance programmes.
404-3	Percentage of employees receiving regular performance and career development reviews		In 2025, around 31% of all employees took part in the Performance and Development Review process (49% of all female employees and 25% of all male employees; 8% of all production employees and 74% of all non-production employees).
Created by Empowered People – Provide purposeful employment for all of us in a diverse and inclusive workplace			
GRI 3: Material topics (2021)			
3-3	Management of material topics	SD report – Created by Empowered People (pages 43-46)	
GRI-401: Employment (2016)			
401-1	New employee hires and employee turnover	ESRS & Performance index (page 11)	
GRI-402: Labour/management relations (2016)			
402-1	Minimum notice periods regarding operational changes		Affected employees and the representatives of Mondi's plants in Stambolijski (Bulgaria) and Pine Bluff (USA) were informed about the closure of their plants in 2024, in line with local legislation, specific collective bargaining agreements and requirements for public disclosure, at least 60 days in the USA and at least 45 days in Bulgaria before operational changes. The applicable collective bargaining agreement for affected employees in the USA specifies a minimum employee notice period of 10 days. The operational changes and resulting impacts on employees took effect in 2025.
GRI-405: Diversity and equal opportunity (2016)			
405-1	Diversity of governance bodies and employees	Integrated report – Board of directors (pages 69-71), Executive Committee and Company Secretary (page 69) ESRS & Performance index (pages 8, 11)	Board of directors: 40% female, 60% male; 100% in age group over 50 years. The percentage of female direct reports to the Executive Committee was 32% in 2025 (2024: 29%).

GRI/SASB standards	Disclosure	Location in reporting suite	Direct answers, notes and omissions
Created by Empowered People – Create an environment that enables a positive work-life experience, valuing safety, health and mental wellbeing			
GRI 3: Material topics (2021)			
3-3	Management of material topics	SD report – Created by Empowered People (pages 47-54)	
GRI-403: Occupational health and safety (2018)			
403-1	Occupational health and safety management system	SD report – Created by Empowered People (page 49)	
403-2	Hazard identification, risk assessment, and incident investigation	SD report – Created by Empowered People (pages 48-50)	Mondi has a Practice Note for Risk Assessments and all safety and health teams have been trained in the correct use of the requirements. Assessing quality of risk assessments forms part of the Modular Training Programme for SHE professionals.
403-3	Occupational health services	SD report – Created by Empowered People (page 52)	We are not able to report on the quality of health services at the sites. Services are provided by professional health service providers. We use accredited occupational health practitioners to guide and assist in identifying occupational health hazards in our Group.
403-4	Worker participation, consultation, and communication on occupational health and safety	SD report – Created by Empowered People (pages 47-50)	We do not have joint management-worker health and safety committees at all sites; however, all sites have implemented the Engagement Board process, thereby supporting worker participation, consultation and communication. Our employees and contractors have access to SpeakOut, our anonymous whistleblowing and grievance platform, where they can raise issues of concern on all topics including safety and occupational health.
403-5	Worker training on occupational health and safety	SD report – Created by Empowered People (pages 47-50)	
403-6	Promotion of worker health	SD report – Created by Empowered People (pages 52)	
403-7	Prevention and mitigation of occupational health and safety impacts directly linked by business relationships	SD report – Created by Empowered People (pages 47-52)	
403-8	Workers covered by an occupational health and safety management system	SD report – Created by Empowered People (page 49)	92% of own workers at our mills, and 90% of own workers at our converting operations are covered by ISO 45001.
403-9	Work-related injuries	SD report – Created by Empowered People (page 52)	We disclose the absolute number of fatalities and life-altering injuries and the root causes annually, but do not calculate rates as these numbers are not meaningful as indicators. For example our fatality rate and life-altering injury rate in 2025 would be calculated as 0.006 and 0.012 respectively (per 200,000 hours worked). The information in our Safety section addresses life-altering injuries, which are equivalent to high-consequence work-related injuries.
Taking Action on Climate – Reduce our greenhouse gas emissions in line with science-based targets			
GRI 3: Material topics (2021)			
3-3	Management of material topics	SD report – Taking Action on Climate (pages 58-64)	
GRI-201: Economic performance (2016)			
201-2	Financial implications and other risks and opportunities due to climate change	Integrated report – TCFD (pages 47-52), Principal risks (page 59)

303-1	Interactions with water as a shared resource	SD report – Taking Action on Climate (pages 70-72), Environmental performance (pages 78-80)	
303-2	Management of water discharge-related impacts	SD report – Environmental performance (page 79)	
303-3	Water withdrawal	SD report – Environmental performance (page 79)	
303-4	Water discharge	SD report – Environmental performance (page 79) ESRS & Performance index (page 6)	TSS to fresh water was 2,286 in 2025 (2024: 2,165) and TSS to ocean/sea was 1,972 in 2025 (2024: 1,838).
303-5	Water consumption	SD report – Environmental performance (page 79) ESRS & Performance index (page 6)	Mondi operations do not use water storage facilities.
GRI-305: Emissions (2016)			
305-6	Emissions of ozone-depleting substances (ODS)	SD report – Environmental performance (page 81)	
305-7	Nitrogen oxides (NOX), sulphur oxides (SOX), and other significant air emissions	SD report – Environmental performance (page 81)	
GRI-306: Waste (2020)			
306-1	Waste generation and significant waste-related impacts	SD report – Circular Driven Solutions (pages 32-33), Environmental performance (page 82-83)	
306-2	Management of significant waste-related impacts	SD report – Circular Driven Solutions (pages 32-33), Environmental performance (page 82-83)	
306-3	Waste generated	SD report – Circular Driven Solutions (page 33), Environmental performance (page 83) ESRS & Performance index (page 7)	
306-4	Waste diverted from disposal	SD report – Environmental performance (page 82, 83) ESRS & Performance index (page 7)	Our reported waste comes from our production processes. Where by-products from manufacturing can be repurposed or reused, they are recycled and utilised as secondary raw materials. Our waste management hierarchy prioritises waste prevention, followed by recovery operations that divert waste from being sent to disposal, such as preparation for reuse of by-products, recycling or incineration.
306-5	Waste directed to disposal	SD report – Environmental performance (page 82, 83) ESRS & Performance index (page 7)	Waste for incineration with energy recovery is done with used solvents.
