

THE PERFECT SOLUTION  
FOR PRECISE DOSING

## Effusion Bag

The award-winning **Effusion Bag** enables end users to accurately and easily discharge the bag's contents.

### Key benefits:

- Convenience for end users
- Precise and easy dosing
- Extended storage period and usage
- Sustainable packaging solution

### More convenience for end users

With the **Effusion Bag**, Mondi provides a highly convenient solution for the controlled dosing of bag contents. The concept of the **Effusion Bag** is clear: the opening can easily be formed with a few quick hand movements. With the additional help of the handle, end users can then

accurately dose or empty the filled goods via the funnel-shaped opening. The bag stays intact, can be easily handled and spillage is minimised.

### Precise and easy dosing

Thanks to the accurate and convenient pouring of contents, this solution offers extraordinary advantages for products such as building materials that must be dosed for mixing and processing the final compound. In addition to this application, the **Effusion Bag** is suitable for food, feed, cat litter and pet food

**SUSTAINABLE** *by DESIGN*

# EXTENDED STORAGE PERIOD AND USAGE

The **Effusion Bag** is also designed for optimal product protection by using a sturdy paper bag that tightly encloses the filled goods. For additional protection against moisture, a PE-free film is used as a second ply, thus offering extended storage life of the filled bags. Thanks to its innovative design, the **Effusion Bag** can easily be opened without tearing the bag apart, which in turn allows the end user to reclose it and save the remaining contents for later use.

## Sustainable solution

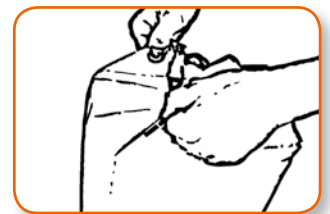

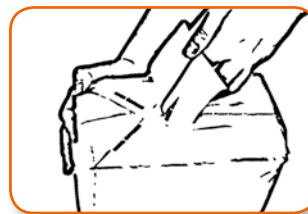

The **Effusion Bag** offers customers economic and cost-effective packaging thanks to its optimised and reduced material usage. The empty bag can be recycled as regular paper packaging in official waste disposal systems.

## Areas of application

- Building materials
- Food
- Feed
- Pet food and pet care products

**For its outstanding convenience features, the Effusion Bag was awarded the emballissimo 2008 and the WorldStar 2008, and won the EUROSAC Grand Prix 2010 as 'Sack of the Year'**

The **Effusion Bag** is a patented innovation by Mondi.  
Patent no.: 2138406
