

OLMO MaxFilm – More comfort with transparency

Our peelable process liner with full transparency

Our new peelable process liner for the flexible foam industry, **OLMO MaxFilm**, offers

Higher Productivity

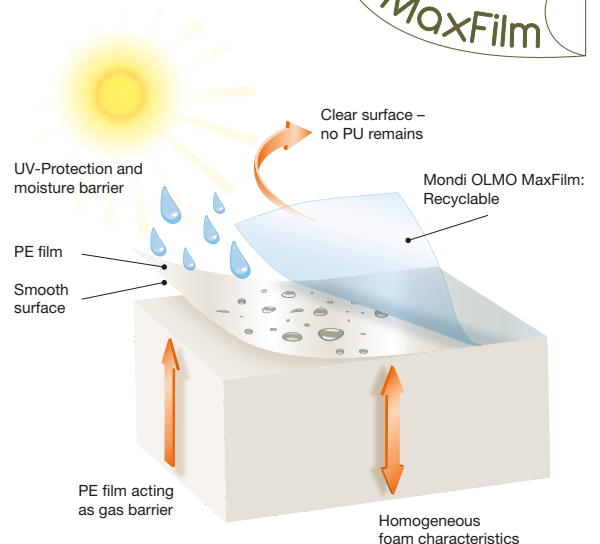

- Full transparency – film acts like a window to the foam
- Thinnest peelable process liner available
- More linear meters per reel - less frequent reel changes

Better Runnability

- Strongest peelable process liner on the market
- Lower risk of webbreaks
- Full technical support – www.barrierchat.com

Less Environmental Impact

- MaxFilm remains free of contaminants
- Fully recyclable
- Zero Waste Concept

Olmo MaxFilm versus other liners

* = ●●●● where the film remains on the foam block

The peelable PE film of all our process liners stick to the foam, resulting in:

- ✓ TDI savings
- ✓ Material loss prevention
- ✓ Uniform hardness and sharp edges
- ✓ Barrier against moisture, UV and reactive chemicals

Our products save material, time and money - every day
