

WOOD PROCUREMENT POLICY

With awareness of the renewable nature of timber sources, when performing our business, we are committed to:

- constant, continuous and even use of forest resources,*
- maintaining the forest multi-functional nature,*
- forestry legislation, including international, European and national laws regarding CITES.*

In consideration of afore-said principles, we prefer wood sources where proper forestry management principles are adhered to:

We do not purchase:

- illegally harvested wood,*
- wood harvested in violation of traditional and civil rights,*
- wood harvested in forests where high conservation values are threatened by business activities,*
- wood harvested in forests converted to plantations or non-forest use areas,*
- wood from forests in which genetically modified trees are planted,*
- wood from the areas where sanctions are imposed by the ONZ, EU or national governments to reduce export/ import of forest products.*

Through our sourcing area, supplier and supply evaluation and verifications systems in place, we ensure that wood is not sourced from areas in violation of good forestry management principles.
