

pak-(k)it

Protected packaging

When time is critical!

The new shipping and storage container from the Ansbach think tank.

An all-rounder in every way. Small and space saving as a flat pack for delivery and storage, but a huge asset when in use. One person can erect **pak-(k)it** alone in a flash.

The highly versatile container has proved its worth, for example for shipping spare parts in the automotive and auto components industries.

Custom packaging sizes and corrugated board grades enable load capacities of up to 900 kg.

Benefits:

- Time and space-saving packaging system
- Integrated pallet
- Very fast to erect (handling costs)
- High stackability
- Custom sizes and corrugated board grades
- Despite several parts, only one stock item

pak-(k)it is ready made and supplied as a flat pack. It only takes one forklift trip to transport the packaging from the warehouse to where it is needed.

Additional packaging materials, such as die-cut inserts, film or foam, can be used with **pak-(k)it** if required.

The side walls, which are attached to the pallet, are folded on the bottom under the lid.

Erecting the container, even a large shipping unit, is quick and no trouble at all for one person.

Our custom packaging sizes and corrugated board grades enable us to meet your product and shipping needs.

Whether you ship by road, air or sea, ask us – we will be happy to advise you on selecting the right design.
