

notch-fold

The great folding box for very long and heavy goods!

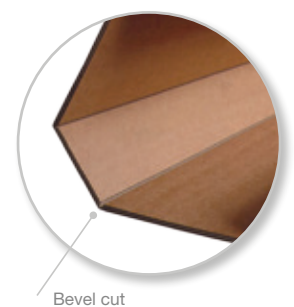

Folding very long packaging made of heavy-duty corrugated board is child's play with the precision bevel cuts at an angle of 45°. It therefore takes very little effort to pack heavy products up to 7.5 metres long ready for shipping.

Corrugated inserts stapled to the ends provide an additional buffer protecting your product against damage in transit.

Strapped or sealed with adhesive tape, the individual shipping units can be easily stacked.

Benefits:

- Space-saving shipping
- Easy to erect
- Custom sizes
- Low tare weight compared with wooden crates
- Stackable
- Underclearance for lifting equipment
- Edge protection for your product
- Easy packaging material disposal

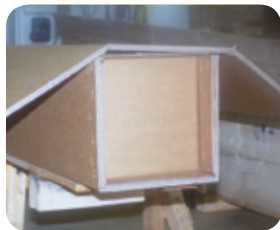

Bevel cut

In short – **notch-fold** is just the right packaging for long and heavy goods.

notch-fold – in one piece

Corrugated board grades: AC; BCB; ACA; X-PLY
 Maximum length: 7,500 mm
 Minimum inside dimensions: height 80 mm/width 80 mm

notch-fold – in two pieces

Straps with special wooden runners mean lifting equipment can be moved under the notch-fold packaging.
