

Advantage MF SpringPack Plus

More than you expect from paper.

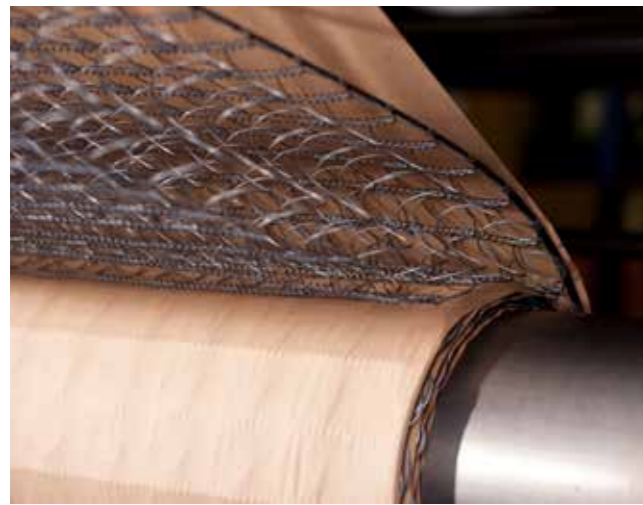

IN TOUCH EVERY DAY
www.mondigroup.com

Paper packaging makes the difference in roll packing.

More strength and sustainability than you expect.

Advantage MF SpringPack Plus was developed specifically for roll packing and compressing goods. To withstand the force of 10 to 15 compressed and wrapped spring mattress units, we provide the very strongest paper. So strong that it even holds the world record. Would you have expected that?

Advantage MF SpringPack Plus exceeds efficiency expectations.

Roll packing spring mattress units is the most efficient solution on the market. The roll-pack method improves packing speed and workplace safety, and facilitates handling. A single operator can run the roll-pack machine alone, packing 200 mattresses an hour. That is 3 times faster than flat packing. Roll packing saves time and money by increasing efficiency and productivity. It ensures efficient storage and smooth deliveries.

Natural premium quality makes your business more sustainable. Every day.

Advantage MF SpringPack Plus is made of wood pulp from PEFC™/FSC™ certified forests and is fully recyclable. The paper is produced by Mondi Dynäs in Sweden and available in a substance range of 110-160 g/m². Its unique characteristics are attributable to pure, unbleached kraft pulp containing 100 % primary fibres from slow growing Swedish softwood. Therein lies the secret of the strongest, natural brown premium paper produced by Mondi.

More benefits than you expect.

Advantage MF SpringPack Plus from Mondi combines unbelievable strength with economic and environmental benefits.

- **Safe packaging** – user friendly and safe to handle
- **Efficient packaging** – mattresses are packed more compactly and faster than ever
- **Efficient delivery** – for you and your customers
- **Space-saving storage** – roll packs take up little space in your warehouse
- **Eco-friendly** – paper is a renewable resource and fully recyclable
- **No product limitation** – roll-packing method for both pocket spring and Bonnell spring units
- **Different packing widths** – Advantage MF SpringPack Plus dimensions for any mattress
- **Lower logistical costs** – roll packing achieves handling cost economies

A single sheet of paper can lift a locomotive.

Advantage MF SpringPack Plus is the strongest paper in the world, as proven by a Guinness World Record. The strength of this brown MF grade has been demonstrated by lifting a 4.2-tonne container on a single sheet. And in 2003 we unofficially broke our own record by parking and lifting a 9.8-tonne locomotive on a single sheet. Could there possibly be a better solution for roll packing your spring mattress units?

Available around the world.

From Sweden into new markets.

Cooperation takes Mondi Advantage MF SpringPack Plus around the world.

We produce Advantage MF SpringPack Plus in Sweden and distribute it worldwide. We are represented on every continent and have a global sales network to support our good customer relations.

Recently we launched a new trading venture on the Asian market with Nantongpack – the ideal partner for Mondi Speciality Kraft Paper. The company is well-established, knows the market inside out, and oversees a sales network throughout China.

In Asia PP woven and plastic materials are currently used for spring mattress unit packaging. Advantage MF SpringPack Plus represents an appealing alternative by offering the same strength with less material.

With Advantage MF SpringPack Plus we provide both: economic and environmental benefits.

Arrival of the first Advantage MF SpringPack Plus reel at Nantongpack China in June 2016 (from left to right: Carsten Breiter, International Key Account Manager Speciality Kraft Paper, Mondi Europe & International; Denny Zhen, General Manager, Nantongpack International; Gerhard Pachler, Head of Sales Region North Speciality Kraft Paper; Mondi Europe & International)
