

# Let's change the conversation together.

#MakeLifeMoreUseful

## The ocean is for fish

Pictures of plastic polluting the oceans are everywhere, and consumers and regulators are demanding action from the packaging industry. Our award-winning BarrierPack Recyclable answers those demands. This mono-material solution is 100% recyclable and allows you to make a leap forward in meeting your sustainability commitments. Change the conversation by offering your customers flexible plastic packaging designed for a circular economy.

With consumers, politicians and the media giving more and more attention to the issue of plastic waste, the plastic industry is changing how it does business. Players all along the value chain are rethinking how to design and use packaging in ways that reduces the ecological impact of products throughout their lifecycle. At Mondi we are committed to doing our part.

### Our framework for creating innovative sustainable packaging

Reduced material weight

Extends shelf life

Smart Downgauging

Designed for recycling

Conserve raw materials

Bio-based materials

---

## Let's change the conversation together.

Our commitment to developing and producing sustainable plastic packaging makes Mondi the ideal partner for meeting your sustainability objectives.

- **Mono Material PE Laminate**
- **No aluminium foil and black colour**
- **Use for various FMCG applications**
- **Minimises environmental footprint**

---

# A new standard for sustainable plastic packaging

Let's make life more useful: our new BarrierPack Recyclable is a leap forward in making recyclable flexible plastic packaging a reality.

## Designed for recycling

- Replaces non-recyclable laminates
- Suitable for mechanical recycling where existing recycling systems are in place

## Suitable for conversion on existing packaging lines

- Lighter than PET/PE laminates of the same thickness

## Excellent shelf presence

- Works with high-definition flexo and gravure print processes
- Artwork protection due to reverse printing
- Stiff laminate stands up and greets shoppers

## Convenient and versatile

- Linear tear without pre-perforation
- With moisture barrier

\* where suitable collection and recycling systems are in place

# Award-winning packaging

Best Technology Innovation in Plastics Recycling

Sustainable Packaging

**“This innovation shows that flexible plastic packaging can become truly circular. Design for Recycling is key to enable circularity to safeguard precious resources in Europe.”**

Ton Emans, President of Plastics Recyclers Europe

**“This is an extremely important step forward in the development of barrier packaging materials, which is why they won.”**

Karen Laird, Editor of Plastic News Europe

# Mondi – a strategic partner for growth.

At Mondi, we work to make life more useful – more useful to people and to the environment. Every day, we deliver innovative packaging that fits shoppers' environmentally conscious outlook, while satisfying their expectations for convenience.

Let's change the conversation together.

## Four priorities shape our support of the circular economy
